Guilt-free Leather Products

Sustainable solutions from EcoFilos

At EcoFilos, we are shaping the future of materials through refined, plant-based leather alternatives. By upcycling agricultural by-products such as corn husk and banana stem into elegant, high-performance bio-based materials, we create sustainable alternatives that combine premium quality with a meaningful reduction in environmental impact.

Vegan Leather Product Range

Our process fosters a more circular and responsible materials economy, rooted in ethical and conscious production. Each finished product or sheet reflects a step toward sustainable fashion, innovative design, and a future less reliant on conventional animal and plastic-based leather.

Hand-crafted Sheets

Crafted from high-bio-content, these plant-based sheets bring you sustainability, durability, and premium appeal. Available in two size variants based on requirements.

Pebbled Texture / Pattern

Crocodile Texture / Pattern

Snake Texture / Pattern

Why “our” Plant-Based Leather?

- **Made from Agricultural By-products**
Transforms materials that might otherwise go to waste into valuable products.
- **Cruelty-Free & Vegan**
A responsible alternative that contains no animal-derived components and is recognized by organizations such as PETA and The Vegan Society.
- **Designed for a Circular Future**
Helps reduce dependence on conventional leather while supporting more sustainable material choices.
- **Protective Finish**
Minimal PU coating for durability while preserving sustainability.
- **Eco-Fiendly Production**
Handcrafted sheets manufactured with low water and energy usage.
- **Premium Look. Modern Design**
Beautifully crafted handbags, laptop bags, crossbody bags and lifestyle accessories prove that sustainability and style can go hand in hand.
- **Made to Last**
Engineered for durability, with abrasion testing supporting suitability for everyday products like bags and accessories.
- **Certifications & Testing**
USDA BioPreferred® — 99% bio-based content
PETA-Approved Vegan — completely animal-free material tested for key mechanical and chemical properties.
Biodegradability tested for natural breakdown of bio-based components over time.

Luxury Has Evolved
Nature Is the New Standard

COLLABORATION

Let's Work Together

From eco gifting, sustainable tableware to biodegradable/compostable industrial packaging, we provide customized sustainable solutions based on your product and company requirements.

We would love to explore product synergies and collaboration opportunities.

Lohit S. [Bengaluru] & **Ajit D.** [Vadodara]
